moon

## About

Moon Workshop is a furniture & joinery company that combines a strong design culture with a team of highly skilled craftsmen.

Moon Workshop is part of the Moon Group that consists of Moon Architect and Builder and Moon Home.

Moon Workshop has made a huge contribution to over 300 completed residential and commercial projects in Bristol, Bath and more recently Cheltenham for Moon Architect + Builder.

We have now expanded this service to other business clients throughout the South West. Our history of delivering very high quality projects over the last 16 years puts us in a unique position to understand the demands and level of finish required to complete successful projects.

We can either provide a full design and making service, from one-off bespoke pieces to full packages of furniture and fittings for interior fit outs, or we can work with your appointed architects. Our team can assist with any technical and design information regarding architectural joinery and fitted furniture early in the process.

## Our Workshop

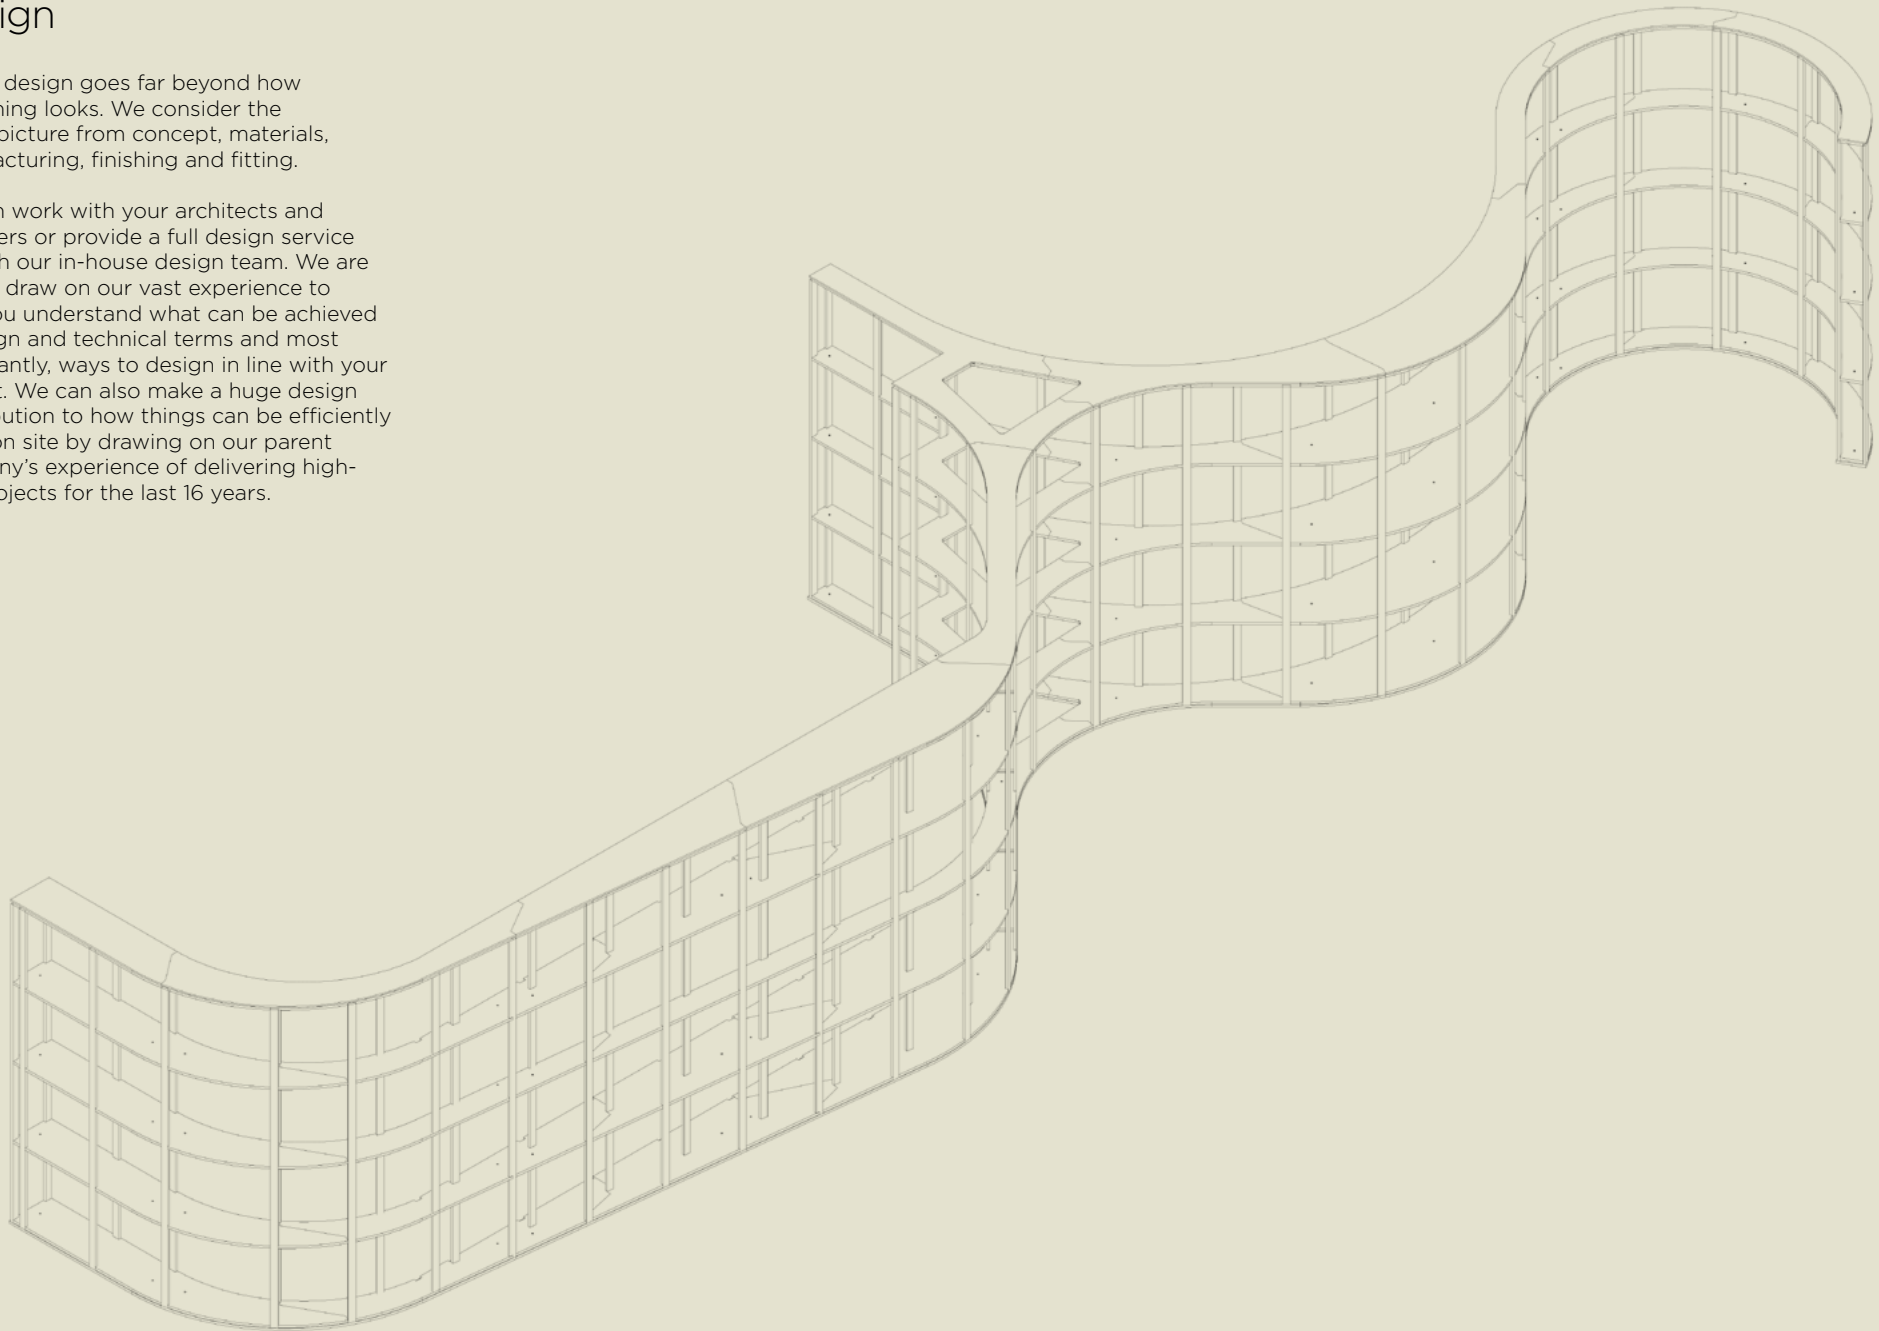

We occupy significant workshop space in Avonmouth, Bristol which has seen considerable investment over the years in modern tooling. This, combined with a highly skilled craft-base team, enables us to produce a huge range of furniture and joinery.

We also have a large spray finishing facility for painted and lacquered finishes.

## Design

For us, design goes far beyond how something looks. We consider the whole picture from concept, materials, manufacturing, finishing and fitting.

We can work with your architects and designers or provide a full design service through our in-house design team. We are able to draw on our vast experience to help you understand what can be achieved in design and technical terms and most importantly, ways to design in line with your budget. We can also make a huge design contribution to how things can be efficiently fitted on site by drawing on our parent company's experience of delivering high-end projects for the last 16 years.

## Making

We are able to make a large range of products in our workshop from very bespoke items to production for commercial fit-outs. We are able to deal with both contemporary and traditional detailing.
